Customer Transaction Report

Report Module Guide: Customer Transaction Report

Module Location

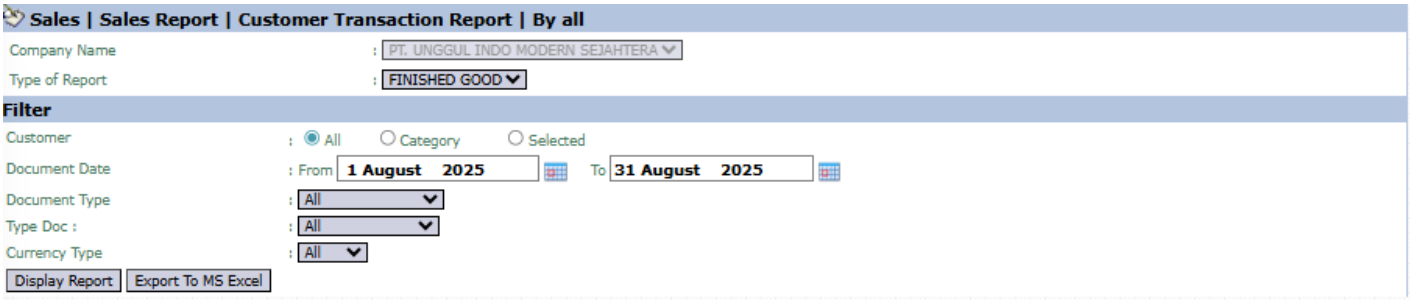

Sales > Reports > Customer Reports > Customer Transaction Report

Module Objective

The **Customer Transaction Report** module is used to generate a combined report that displays the history of various types of sales transaction documents for a specific customer. This report consolidates data from multiple document types (such as Proforma Invoice and Sales Order) into a single view to facilitate tracing and analysis.

1. Report Parameters (Filter)

The main page of this module is a form containing various parameters to customize the report that will be generated.

Here is an explanation for each parameter:

- **Customer**:

- Select the customer scope for the report: **All**, **Category** (by Category), or **Selected** (for a specific Customer).

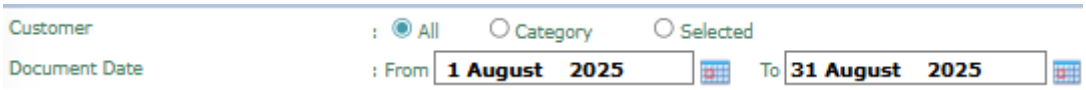

- **Document Date**:
  - Specify the **From** and **To** date range to define the period of transactions to be displayed (e.g., August 1, 2025, to August 31, 2025).

- **Document Type**:
  - Use this dropdown to select the specific document type you wish to see (for example, only Sales Orders), or select **'All'** to display all transaction types.

2. Steps to Generate the Report

Step 1: Set Report Parameters

Select all the parameters you need, especially defining the **Document Date** range and the **Customer** scope.

Step 2: Generate the Report

After all parameters are set, click one of the two buttons in the bottom-left section of the page:

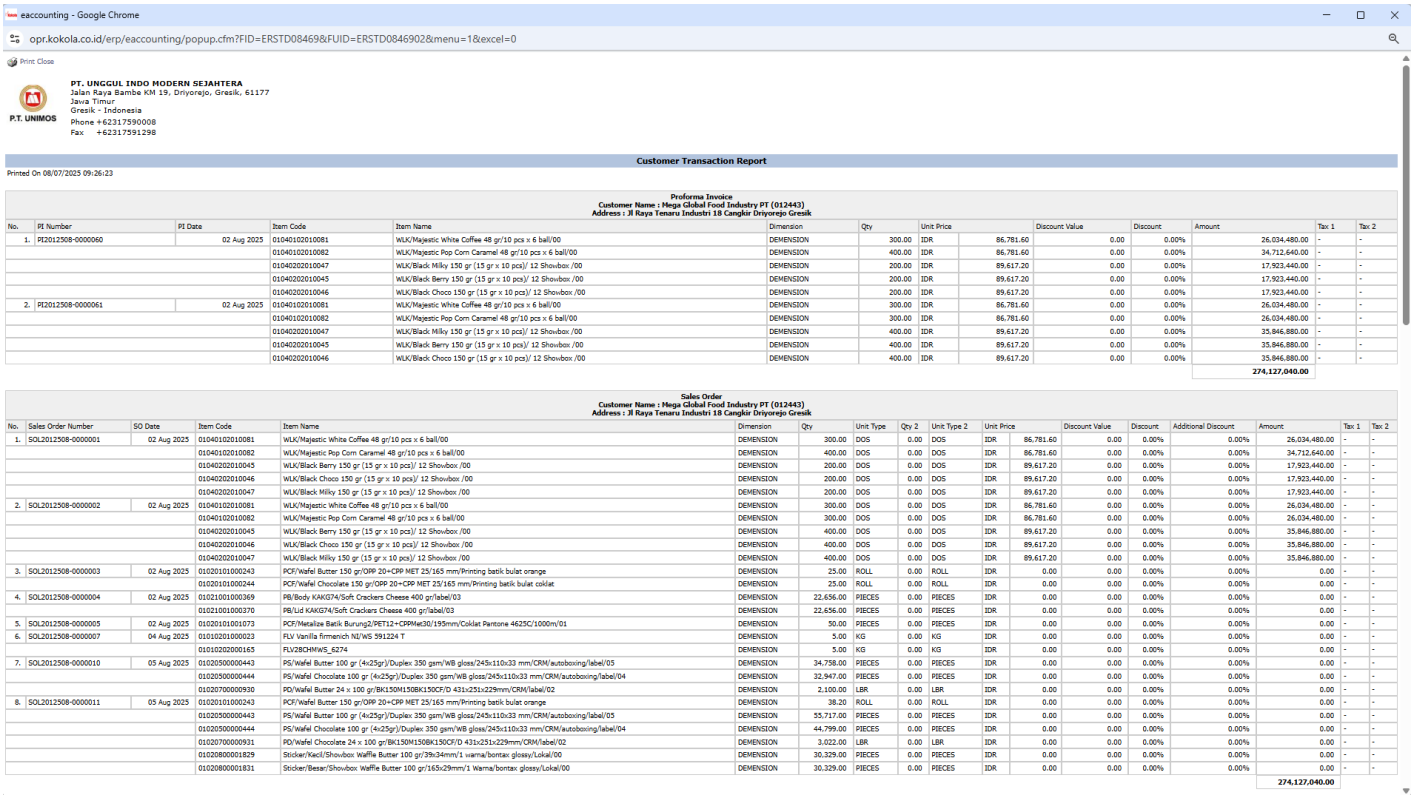

- **Display Report**: To preview the customer transaction report directly on your screen. 

- **Export To MS Excel**: To download the report data in an Excel file format.

Export To MS Excel

3. Example of the Report View

After you click, the system will generate a detailed report like the following, which groups transactions by their document type.

eaccounting - Google Chrome

opr.kokola.co.id/erp/eaccounting/popup.cfm?FID=ERSTD08469&FUID=ERSTD0846902&menu=1&excel=0

Report Explanation: This report displays a list of transactions grouped by their type, such as a section for **Proforma Invoices** and a section for **Sales Orders**.

Key Columns: Each section will detail the transactions with relevant columns such as **PI Number** or **Sales Order Number**, **Item Code**, **Item Name**, **Qty**, and **Amount**.

Tips & Important Notes

- Use this report to get a complete overview of the entire **sales document flow** for a customer in a single view.
- The **Document Type** filter is very useful if you only want to focus on one type of transaction, for example, reviewing all Sales Orders from a specific customer in a month.
- This report is very helpful for the **Sales and Customer Service teams** to track the complete transaction history of a customer.
