

Remnant & Scrap Goods Mutation Report

Report Module Guide: Remnant & Scrap Goods Mutation Report (BC Scrap Mutation Report)

Module Location

Inventory > Bonded Zone > Remnant & Scrap Goods Mutation Report

Module Objective

The **Remnant & Scrap Goods Mutation Report** module is used to generate a mutation (movement) report that specifically tracks leftover production items or scrap. This report is specially designed to meet the Customs (BC) reporting requirements related to the management and recording of waste or production remnants within a Bonded Zone.

1. Report Parameters (Filter)

The main page of this module is a form containing various parameters to generate a specific report.

Here is an explanation for each parameter:

- **Item/Service Category Type:**

- This filter is specifically set to **SCRAP** to ensure the report only displays leftover/waste items.

- **Type Document BC:**

- Filter transactions by the relevant customs document type for scrap reporting.

- **Period:**

- Specify the mutation date range in the **From** and **To** fields that you wish to report.

2. Steps to Generate the Report

Step 1: Set Report Parameters

Define the parameters you need, especially the report **Period**.

Step 2: Generate the Report

After all parameters are set, click one of the two buttons at the bottom:

- **[Display]:** To preview the scrap mutation report directly on your screen.
- **[Export to MS Excel]:** To download the report data in an Excel file format.

3. Reading the Report (Report Content)

The generated report is a stock mutation report that is ready to be submitted to Customs, specifically for scrap items.

This report will display the standard mutation format for scrap items:

- Beginning balance of scrap.
- Total inflow of scrap (resulting from production).
- Total outflow of scrap (e.g., sold or destroyed).
- Ending balance of scrap.

Each line will detail the movement per scrap item with columns such as Date, Transaction Number, and Item/Service Code.

Tips & Important Notes

- This report is an essential component of a Bonded Zone company's **reporting obligations** to Customs.
- Maintaining the accuracy of this scrap mutation report is crucial for audits and **compliance** with regulations.
- This module is a crucial work tool for the **Exim (Export-Import) and PPIC teams** responsible for recording production remnants.
