

RQF Customer

Module Guide: Customer RFQ

Module Location

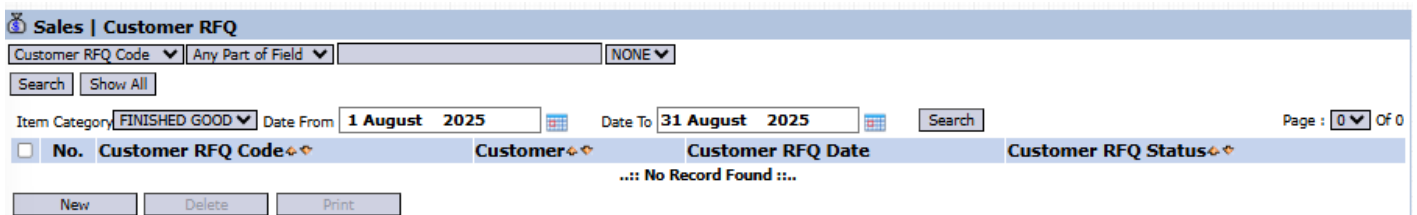

Sales > Quotation > Customer RFQ

Module Objective

The **Customer RFQ (Request for Quotation)** module is used to record and manage official requests for price quotations received from customers. This module serves as the starting point of the formal sales process, where a customer's request is documented in the system before the company provides an official price offer.

1. Main View (Customer RFQ List)

The main page of this module displays a list of all RFQs that have been received from customers and recorded in the system.

The screenshot shows the 'Sales | Customer RFQ' interface. It includes search filters for 'Customer RFQ Code', 'Any Part of Field', and 'NONE'. There are 'Search' and 'Show All' buttons. Below, there are filters for 'Item Category' (FINISHED GOOD), 'Date From' (1 August 2025), and 'Date To' (31 August 2025), with a 'Search' button and 'Page : 0 Of 0' indicator. The table header has columns: 'No.', 'Customer RFQ Code', 'Customer', 'Customer RFQ Date', and 'Customer RFQ Status'. A message below the header states '...: No Record Found ...'. At the bottom, there are 'New', 'Delete', and 'Print' buttons.

View Explanation & Filters

This page is for viewing and managing all incoming RFQs.

- **Filters:** You can search for a specific RFQ by **Customer RFQ Code**, **Item Category**, or a date range (**Date From / Date To**).

- **RFQ List:** The table below will display all RFQs that match the filters, with columns such as **Customer RFQ Code**, **Customer**, **Customer RFQ Date**, and **Customer RFQ Status**.

Button Functions

- **New:** The primary button to record a new RFQ received from a customer.
- **Delete:** To delete a selected RFQ data.
- **Print:** To print the details of a selected RFQ.

2. Steps to Create a Customer RFQ

Step 1: Create a New RFQ Record

From the Main View, click the **New** button to open the **Create Customer RFQ** form. 

Step 2: Fill in Header Information

On the form that appears, fill in the general information regarding the customer's request:

- **Customer:** Select the customer who sent the RFQ.

Customer * :

- **External RFQ Number:** Enter the RFQ reference number from the document provided by the customer. This is important for matching documents.

Eksternal RFQ Number :

- **RFQ Date:** Select the date the RFQ was received.

RFQ
Date * : 5 August 2025 

- **Sales Person:** Assign the salesperson responsible for handling this request.

Sales
Person * : 

Step 3: Detail the Requested Items

Use the detail table at the bottom to list all the products and quantities requested by the customer:

1. Click the **[+] Multiple Item [-]** link to add or remove rows.

[\[+ Multiple Item\] \[-\]](#)

2. Fill in the **Item Code** and **Quantity** columns according to the customer's request document.

Step 4: Save the RFQ

After all data is filled in, click the **Save** button in the bottom-left section to save the RFQ record into the system. 

Tips & Important Notes

- Recording a customer's RFQ in this module is a good first step for a **structured and documented** sales process.
- The RFQ data saved here will become the basis for creating the official **Quotation** document for the customer in the next module.
- Always fill in the **External RFQ Number** field if it is available, to facilitate communication and document matching with the

customer.
