

Sales Forecast

Report Module Guide: Sales Forecast

Module Location

Sales > Sales Forecasting > Sales Forecast

Module Objective

The **Sales Forecast** report module is used to generate a highly detailed sales forecast report in a matrix format. This report presents daily sales forecast data for each product item and can be filtered by distributor and period, making it a critical input for production and inventory planning.

1. Report Parameters

The main page of this module is a simple form containing several parameters to define the report that will be generated.

The screenshot shows a web interface for the Sales Forecast report. At the top, there is a breadcrumb trail: "Penjualan | Perkiraan Penjualan | Perkiraan Penjualan". Below this, there are two dropdown menus: "Distributor" with the value "Semua" and "Bulan/tahun" with the values "01" and "2017". At the bottom of the form, there are two buttons: "Display Report" and "Export To MS Excel".

Here is an explanation for each parameter:

- **Distributor:**

- Use this dropdown to select the report's scope, whether for **All** distributors or for a specific distributor.

- **Month/Year:**

- Select the month and year of the forecast period you wish to view (e.g., 01 / 2017).

2. Steps to Generate the Report

Step 1: Set Report Parameters

Define the **Distributor** and **Month/Year** parameters according to the data you wish to see.

Step 2: Generate the Report

After the parameters are set, click one of the two buttons at the bottom:

- **Display Report:** To preview the sales forecast report directly on your screen. 
- **Export To MS Excel:** To download the report data in an Excel file format.

3. Example of the Report View

After you click, the system will generate a detailed report in a matrix format as follows:

- **Report Title:** SALES FORECAST REPORT.
- **Rows:** Show the **Item Code** and **Item Name**, grouped by product category (KUKIS, CRACKERS, CREAM, etc.).
- **Columns:** Show the **Dates** of the month, from the 1st to the 31st, with a **Total** column at the end.
- **Data Cells:** Each cell will contain the forecast sales quantity for a specific item on a specific date.

Tips & Important Notes

- This report provides a very detailed view down to the **daily level**, which is very useful for the **PPIC (Production Planning and Inventory Control)** team to plan the production schedule.

- To ensure the displayed data is accurate, make sure the forecast data from distributors has been uploaded via the **Upload Data Forecast** module before running this report.
