

Trip Activity

Module Guide: Trip Activity

Module Location

Inventory > Shipment Planning > Trip Activity

Module Objective

The **Trip Activity** module serves as a visual calendar or agenda to monitor all scheduled shipping trip activities on a specific day. This module provides a time-based overview of the route or schedule for each shipment.

1. Main View (Activity Calendar)

The main page of this module is a daily calendar that displays time slots.

- **View:** This page displays an hourly agenda for the selected date (e.g., October 13, 2025).
- **Navigation:** You can select a different date using the calendar on the left to see the schedule for that day.
- **Filter:** You can choose to display the schedule based on **Document** or other filters.

2. How to Use

This module is most likely **read-only** and functions as a visual dashboard.

1. Select the date you wish to see on the calendar.
2. The screen will display all shipping activities that have been scheduled in other modules, sorted by the hour.
3. Each entry in the schedule will likely contain information such as the **Delivery Order number, customer name, and driver's name**.

Tips & Important Notes

- Use this module as a **daily dashboard** for the logistics team to monitor departures and shipping schedules.
- The data displayed here most likely comes from other modules such as **Delivery Order** or a more detailed shipping scheduling module.
- This is an effective monitoring tool for **Logistics Managers** to ensure all shipments are running on schedule.
