

Mail User Settings

Objective

With the Zimbra solution, OVHcloud offers an open-source collaborative messaging platform with all the features you need for professional use. This guide helps you choose the configuration method suited to your Zimbra plan and your email client.

Find out which method to choose to configure your Zimbra email account on the email client of your choice.

#Requirements

A subscription to an email account on one of our Zimbra solutions (Zimbra Starter or Zimbra Pro).

An email client installed on the device of your choice.

The login credentials for the email address to configure.
